

## **PRESS RELEASE**

**June 26, 2008**

### **GSM SOLUTIONS LTD LAUNCH DM3 SERVICE IN IRELAND**

**The ONLY system in the world to unlock the FULL and complete range of Nokia BB5 phones.**

The DM3 service has taken the world by storm. There is nothing else like it in the world. Up until very recently Nokia BB5 handset's could not be unlocked by any 3rd party company. Even to this day some of the very newest models still cannot be unlocked by any other company in Ireland.

But now, with the release of the DM3 service in Ireland, GSM Solutions Ltd have confirmed their place in history as the first official 'Irish' service centre for the DM3 team.

As you may or may not know, GSM Solutions Ltd ([GSMsolutions.ie](http://GSMsolutions.ie)) are now the longest running company in Ireland to offer Mobile Phone Unlocking since we launched the service back in the mid 90's. We have the ability to unlock the majority of handsets in our head office while you wait. Some of our current clients include Vodafone, O2, Meteor, 3 Ireland and the Carphone Warehouse retail outlets to name but a few. We also develop unlocking & service software for the industry.

The DM3 Unlocking Server unlocks phones simply, effectively and safely! No Test Points (disassembly) is required so warranty remains intact. Our method is equivalent to original Nokia unlock code.

#### **What is Nokia BB5?**

The essence of BB5 is the main processor - "RAP3G". This name is product code used by Nokia to describe a Texas Instrument integrated processor developed for mobile devices. It's new technology - OMAP 1710 (up to 220 Mhz). These new processors are heavily secured against modifications such as sim lock removal with various checksums and public/private key encryption (certificates)
